

TECHNICAL DATA

# TRIBALLOY T800

## CHARACTERISTICS

TRIBALLOY COBALT-BASED ALLOYS consist of a hard, intermetallic (Laves) phase dispersed in a softer matrix of eutectic or solid solution. They exhibit outstanding resistance to wear and galling, high corrosion resistance, and are particularly suitable where lubrication is a problem. Wear resistance of Triballoy alloys is highly dependent on the volume percentage of the Laves phase.

TRIBALLOY T-800 alloy contains hard intermetallic phases of Mo and Si which give the alloy excellent wear properties over a wide temperature range. T-800 was designed to resist high temperature wear and abrasion and has exceptional oxidation and corrosion resistance due to its high chromium content. T-800 is harder and more resistant to abrasive wear, corrosion, and oxidation than TRIBALLOY T-400. T-800 exhibits outstanding resistance to galling and is particularly suitable where lubrication is a problem.

TRIBALLOY T-800 has been used in a wide range of applications, most notably as a wear surface in aircraft engines. Other applications include galvanizing roll bushings, cams, retainer rings, diesel piston rings, mechanical seals, bearing seats, valve trim, and pump components. Areas of application where Triballoy alloys are used:

- Metal-to-metal wear
- Surfaces that cannot be lubricated (e.g. high temperatures)
- Lubrication starvation
- Fluid lubricants are of low viscosity
- Both wear and corrosion are factors

## NOMINAL COMPOSITION (MASS %) AND PHYSICAL PROPERTIES

Co	Cr	Mo	C	Si	Others	Hardness (HRC)	Density	Melting Range
Base	17.5	28.5	<0.08	3.4	Ni, Fe	54-62 HRC	8.6 g/cm <sup>3</sup> 0.312 lb/in <sup>3</sup>	1288-1352 °C 2350-2465 °F

Deloro Wear Solutions GmbH manufactures and markets sophisticated alloys in the form of castings, powders, coatings, consumables, and machined parts that resist wear, corrosion, and abrasion. Information provided in this document is intended only for general guidance about Deloro Wear Solutions™ products and is the best information in our possession at the time. Product users may request information about their individual use of our products, but Deloro Wear Solutions™ does not warrant or guarantee this information in any way. Selection and purchase of Deloro Wear Solutions™ products is the sole responsibility of the product user based on the suitability of each use. Individual applications must be fully evaluated by the user, including compliance with applicable laws, regulations, and non-infringement. Deloro Wear Solutions™ cannot know or anticipate the many variables that affect individual product use and individual performance results may vary. For these reasons, Deloro Wear Solutions™ does not warrant or guarantee advice or information in this document, assumes no liability regarding the same, and expressly disclaims any warranty of any kind, including any warranty of fitness for a particular purpose, regarding the same.
