FOR MORE THAN 50 YEARS

Your expert for customised wear protection solutions

You are our priority: Together, we develop your custom wear protection solution and take you through every step of the process, from planning to the ready-to-install component. Rely on our extensive expertise for durable wear protection!

We enhance the safety & efficiency of your processes!

resistant to
wear, corrosion &
high temperatures

longer running
times of your
machine

low
maintenance

Welding Solutions

Welding materials

Our welding materials are used in almost all branches of industry where outstanding quality is required.

POWDER

RODS &
ELECTRODES

WIRE

Customised welding systems

We work closely with you to design modern PTA welding systems that are customised to your individual requirements.

WEAR PROTECTION

ENGINE COMPONENTS

360° In-House manufacturing expertise

From the sketch to part – We offer you the entire production chain from a single source and take you through the process:

ANALYSIS & EVALUATION

Together with you, our experts examine your processes and equipment, assessing the wear degree in terms of temperature, corrosion, and operating environment.

CONSULTING

Based on individual requirements, our team of experts in engineering, metallurgy and manufacturing will develop the perfect solution for you.

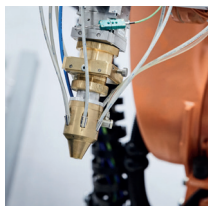

CUSTOMISED MANUFACTURING

We cover the entire value creation process, from material selection, production drawings and material procurement to casting the blank, mechanical processing, protective coating and component assembly.

CASTING

Resin Shell
Investment | Sand
Centrifugal

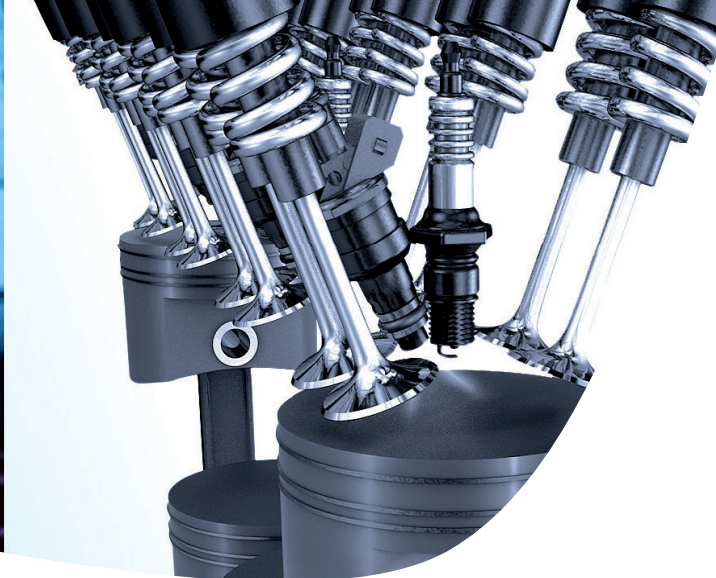

COATING

PTA | HVOF
Laser Cladding
Autogenous Welding

MACHINING

Turning | Milling
EDM | Honing
Grinding | Lapping

Home of Stellite®

Our high-performance alloys provide the components with their resistance and make them durable against any kind of wear – even under extreme operating conditions!
